

Nursery Level Garden Project 2022

The Nursery children had a wonderful time in our garden, putting in their little efforts to sow the seeds, water the plants, watch them grow, harvest and enjoy a healthy meal of the fruits of their labour.

They also experienced making compost from vegetable scraps collected from the school kitchen. Our parents were very supportive in taking time to complete the take home kits, growing vegetables at home with the children, recording the results and reporting back to school for Show and Tell.

Planting our Cucumber seeds

Planting our Eggplant seeds

Harvesting our Vegetables

Preparing our Long Beans egg Omelette

水耕种植法

烹饪活动：《蒜蓉炒蕹菜》

Planting shallots

Watering and harvesting spring onions

Prepared spring onion Omelette

Making Compost

Take Home Kit
